Hazardous Weather

Hazardous Weather

Severe Thunderstorm Potential - 3 PM through 8 PM

Weather Forecast Office
Amarillo, TX
Issued May 28, 2021 3:23 AM CDT

Thunderstorms will be possible this afternoon and evening. A storm may become severe across the far southwest Texas Panhandle with large hail and damaging winds the main threats.

Sunday Severe

Mainly evening

Weather Forecast Office
Norman, OK
Issued May 28, 2021 3:04 AM CDT

There will be a chance of thunderstorms over much of the region Sunday. A few severe storms will be possible over western north Texas in the evening.

Hazardous Weather

Storm Chances Continue Tomorrow (Friday)

Weather Forecast Office
Fort Worth, TX

Some strong or severe storms possible

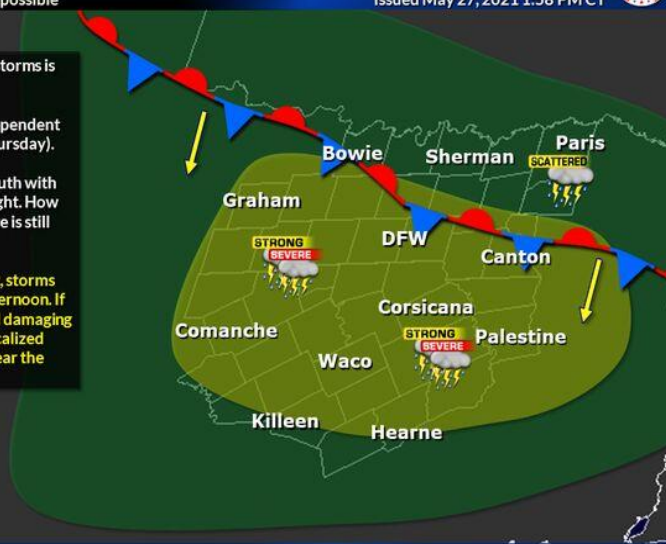

Issued May 27, 2021 1:58 PM CT

Another round of thunderstorms is expected on Friday.

This round will be highly dependent on what occurs tonight (Thursday).

The front will be pushed south with the complex of storms tonight. How far south the front will move is still uncertain at this time.

Near and south of the front, storms may develop tomorrow afternoon. If they develop, large hail and damaging winds will be possible. A localized tornado threat may exist near the front.

NWSFortWorth

weather.gov/fortworth

Another round of storms will develop this afternoon mainly south of I-20. Large hail and damaging winds will be the primary threats. Flooding may occur if heavy rain impacts a particular location for an extended period of time. High temperatures will be in the 80s across the region.

Severe Weather Risk Today

Weather Forecast Office
Corpus Christi, TX

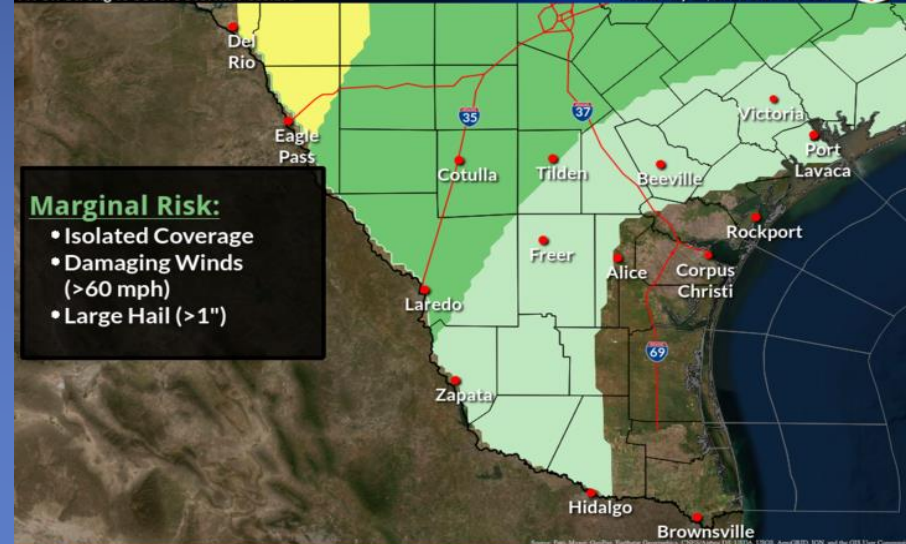

A Few Strong to Severe Storms Possible

Issued May 28, 2021 5:20 AM CDT

Marginal Risk:

- Isolated Coverage
- Damaging Winds (>60 mph)
- Large Hail (>1")

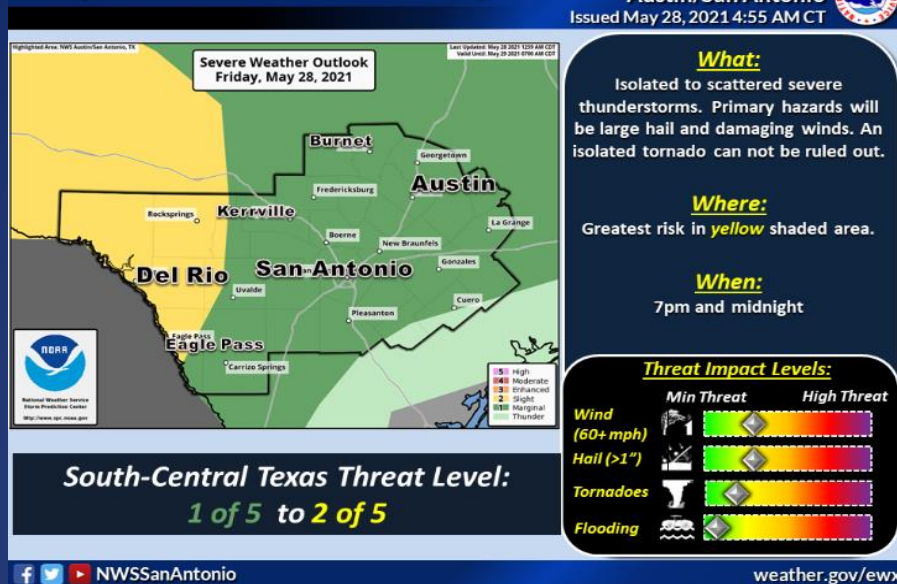

NWSCorpus

weather.gov/crp

A few strong to severe storms will be possible tonight as convection from Mexico could make its way into South Texas. Any storm that develops could result in locally heavy rainfall, large hail and damaging winds.

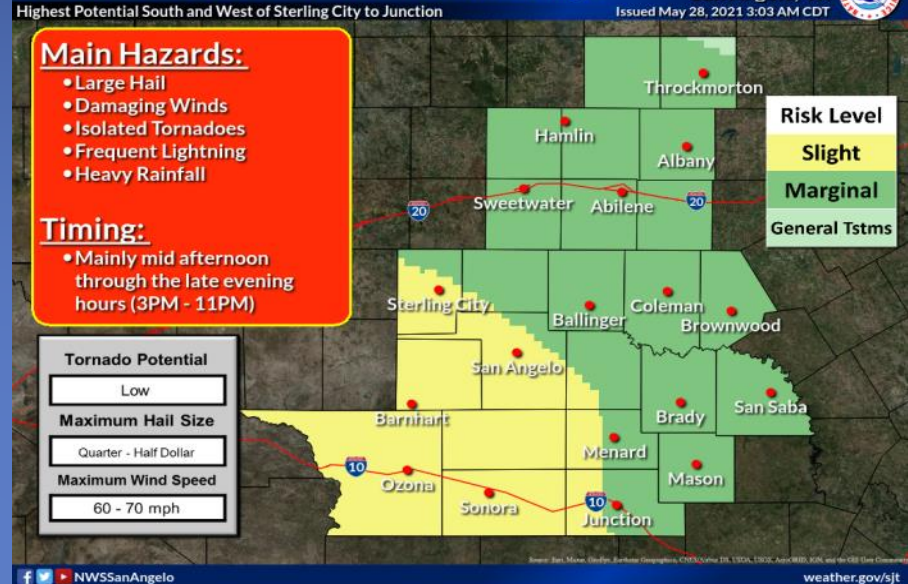

Hazardous Weather

Strong to Severe Storms Possible Tonight

Strong to severe storms possible tonight as an upper disturbance moves across the state, along with the dry line in West Texas. Main hazards are large hail and damaging winds. An isolated tornado or two possible across mainly the southern Edwards Plateau and Rio Grande. Also, there is the potential for heavy rains with 1 to 2 inches, with isolated 4 inches across the Hill Country, Edwards Plateau and the Rio Grande.

Severe Weather Possible this Afternoon and Tonight

Strong to severe thunderstorms are possible this afternoon and tonight. The highest potential is south and west of a Sterling City to Junction line. The main hazards will be damaging winds and large hail, although an isolated tornado cannot be ruled out.

Hazardous Weather

Severe Weather Outlook

Mainly this afternoon and evening

Weather Forecast Office
Midland/Odessa, TX
Issued May 28, 2021 8:08 AM CT

Threats:

Large or Very Large Hail

60+ mph Wind Gusts

Frequent Lightning

A few tornadoes possible

Preparedness Actions

- Always have a severe weather safety plan in place no matter what category your area is in.
- Have multiple ways to receive warnings.

Thunderstorms
No severe storms expected

1 – Marginal
Isolated severe storms possible

2 – Slight
Scattered severe storms possible

3 – Enhanced
Numerous severe storms possible

4 – Moderate
Widespread severe storms likely

5 – High
Widespread severe storms expected

NWSMidland

weather.gov/maf

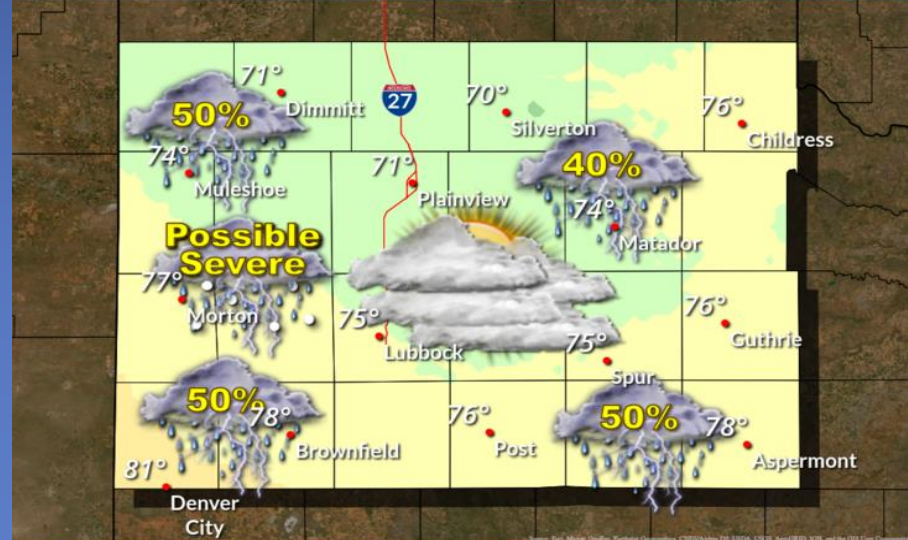

Another round of severe weather is expected this afternoon and evening across a large portion of the region. All severe hazards are possible, including very large hail, damaging winds, and tornadoes. Frequent lightning and heavy rain will also accompany any storm that develops. Ensure you have multiple ways to receive warnings, and have a plan to seek shelter, no matter where you are!

Thunderstorms, some severe, possible this afternoon

Large hail up to two inches in diameter will be the main hazard

Weather Forecast Office
Lubbock, TX

Issued May 28, 2021 3:17 AM CDT

NWSLubbock

weather.gov/lub

The sky will be mostly cloudy with breezy east winds at around 10-20 mph. Isolated (possibly scattered) thunderstorms, some severe, will be possible this afternoon across the western South Plains. Storms will wane in intensity and coverage near sunset.
